

### Solar Roof Tile

**8W** 

Solar Roof Tile is the most powerful solution for area or weight constrained flat rooftops. The photovoltaic roof product combine solar panel, frame, and mounting system into a single pre-engineered unit. The nonpenetrating tiles position highest efficiency solar panels at a 5-degree tilt, for greatest energy production.

Tiles interlock for secure, rapid installation and maximum power output. Smooth-edged, durable and lightweight material designed for a 30-year life protects the roof and eliminates the need for electrical grounding. The patented design resists high winds and corrosion and is flexible to adapt to virtually any flat or low-slope roof.

#### **Main Functions**

#### **Benefits**

- The Most Energy per Rooftop.
   Produces more energy in an area or weight-constrained space than any other roof system available today.
- Roof-Preserving
   Compatible with all roof membranes. Smooth, lightweight design, combined with a non penetrating installation, protects the roof and preserves roof warranties.
- Easy to Install with All-In-One Design.
   Solar panel, frame, and mounting system are integrated into one unit. No grounding or roof penetration needed.
- Long Lasting Durability
   Aerodynamic design is resistant to high winds.
   Strong glass-filled polymer material offers long-term durability. Soiling is minimized with easy water runoff.
